

To whom it may concern:

It has been brought to my attention that there is contemplation again of the City Council to hire paid shooters to come in to Grand Haven and kill deer, to this I am adamantly opposed. Sharpshooters shooting high power weapons in the cemetery or anywhere else in GH is a potential danger to citizens and is socially unacceptable to any civilized, moderately intelligent person.

We vacation in Grand Haven and have for the last twenty years, we love the town and have made many friends in and around town. I am not sure who is prompting this ridiculous idea of introducing this danger to the community and killing wildlife but, what I will share with you is that you would be making a huge mistake in doing such a thing.

I will personally promise to no longer vacation in Grand Haven, or spend a penny in the many fine restaurants and shops (along with every family member, all of my friends and colleges) and further more, you have my word of getting involved to what ever extend necessary to insure some sanity in the decision making process to determine more safe solutions for deer management.

The fact that killing wildlife and putting residents of Grand haven at a safety risk is being contemplated again makes me question the Grand Haven Mayor and Council members for what there motives may be. Believe me when I tell you that there is no future for politicians that think this way and have nothing better to do than kill animals.

Sincerely,

JOSEPH J. PODVIN
